

CT2 (Cynodon dactylon)

WHY CHOOSE CT2

- **Good tolerance to high temperatures**
- **Good winter colour retention in the absence of frosts**
- **Less prone to thatching**
- **Good herbicide resistance**

Drought Tolerant

Grows well with minimal water

High Traffic Tolerant

Very resistant to wear and tear

Required Sunlight

Min. 7 hours of direct sun daily

ABOUT THIS TURF

CT2 is a low-growing variety with dark green leaves. It spreads rapidly by fine reddish coloured stolons and rhizomes. It is suited to golf course fairways and tees, sports fields, home lawns, parks and general landscaping.

CT2 produces less thatch than many other couch varieties and forms a dense surface with its fine leaf type.

It is an attractive dark green colour that has low seed head production.

We are growing.
