

# EMPIRE ZOYSIA

(Zoysia Japonica)

## WHY CHOOSE EMPIRE ZOYSIA

- Gorgeous dark green colour
- Luxurious soft touch feel
- Medium tight leaf blade
- Superb autumn and winter colour
- Thrives in extreme heat and humidity
- Requires less fertiliser
- Highly durable and robust
- Rapid damage recovery
- Good resistance to insects and disease
- Moderate to good shade tolerance
- Highly effective at out competing weeds

### **Drought Tolerant**

Grows well with minimal water

### **High Traffic Tolerant**

Very resistant to wear and tear

### **Required Sunlight**

Min. 6 hours of direct sun daily

## ABOUT THIS TURF

Empire Zoysia is a dense, medium leaf turf variety which is increasing in popularity over couch varieties for its highly appealing look alone. As a lawn choice, Empire offers many advantages over other turf types, and is well worth considering for a low maintenance lawn.

It has a slower growth rate than green or blue couch but it still a fast to establish turf due to its deep root system. Its greatest benefit is the need for significantly less mowing – approximately 35 - 40% less - than couch. This is NOT the lawn mowing enthusiasts variety! This slower growth rate also makes it a far less aggressive grass, needing significantly less edging to keep it from invading the garden beds. Empire Zoysia is also less likely to scalp than couch is if cut too short.

Empire Zoysia has proven itself to be not only beautiful and soft but also a hard wearing lawn perfectly suited to South East Queensland homes.
