## ABOUT THIS TURF

Sir Walter Buffalo is an Australian born and bred turf variety more affectionately known as 'Wally'. Sir Walter is a soft leaf buffalo lawn which has proved to be a top performing grass for our harsh Queensland conditions. Being introduced to Australian Lawns in 1997, Sir Walter buffalo turf has had a large following and is used widely in both Commercial and Domestic settings.

Sir Walter is drought tolerant and requires little mowing or fertilising to keep it looking healthy and strong. The leaf is a wider blade and performs well in full sun or shaded areas. Sir Walter is disease and fungus resistant, has excellent wear/tear tolerance and is a low allergy turf.
